Configura and ProjectMatrix Announce Partnership

Configura, Inc. and ProjectMatrix have signed a partner agreement to collaborate on products and extensions to be used with Configura's CET Designer platform. By partnering with ProjectMatrix, the combination of CET Designer with existing ProjectMatrix products provides dealers, designers and manufacturers with a complete, full service set of solutions.

CET Designer is Configura's new, state-of-the-art design platform that encompasses a wide range of functionality that makes it easy to accurately design and specify configurable products. Configurable products come in many forms, but the most common uses of CET Designer would be for "Tile Systems", complex desk systems and even the more commonly used monolithic panel systems. "Configurable product lines can sometimes require a fairly high level of product expertise," said Johan Lyreborn, CEO of Configura. "With some complex systems, it is easy to inadvertently leave out parts that are necessary to install the configuration properly. CET Designer reduces or eliminates this type of error, because we build a high level of intelligence into the objects used in CET Designer." CET Designer was a Best of Neocon award winner for 2006.

"We are thrilled to be working with Configura to develop extensions for CET Designer", says Mark Herrin, President and CEO of ProjectMatrix. "Our product analysts possess a great deal of product knowledge from our company's 2 decades in the contract furniture industry. ProjectMatrix combines this high level of experience with our 20 years of programming expertise to assist manufacturers in developing objects and creating extensions".

The first CET Designer Extension from ProjectMatrix is *ProjectSymbols for CET Designer*. This extension will integrate their current ProjectSymbols AutoCAD symbol libraries with CET designer. This will allow users to have complete CET Designer drawings, including product lines that have not yet been developed for CET Designer's native format. ProjectSymbols for CET Designer is scheduled to be tested and released by Neocon 2007.

About Configura, Inc.

Configura Inc., a wholly owned subsidiary of Configura Sverige AB, is the market leader in graphical sales configuration software. The company's products are used by thousands of users in leading companies around the world. Configura's mission is to set the industry standard in software tools for automating, simplifying and speeding the sales and order processes. Well-known brands in the European office furniture industry, such as Kinnarps and Martela, already use Configura software, as well as North American companies Spacesaver, Borroughs, TAB, and Haworth. www.configura.com

About ProjectMatrix, Inc.

ProjectMatrix was founded in 1987 by a team of professionals from within the contract furniture industry. For the last 20 years, their goal has been to deliver best-in-class automated specification and design software for the contract furniture professional. Other industry leading products include ProjectSpec, pricing and specification tool, ProjectSymbols

CAD libraries, and ProjectTools CAD productivity tools. These products are available in both site and single seat licenses, including all upgrades. All ProjectMatrix tools are designed by industry professionals, for industry professionals, with thousands of users in 18 countries on 5 continents. www.projectmatrix.com
